DETAILED ACTION

Response to Arguments

1. The restriction requirement made in the previous Office Action has been withdrawn.

Election/Restrictions

2. Amendment of the claims has created a new restriction requirement.
3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Group I drawn to the specifics of the device of an optical encoder with different slope angle grooves and driving system comprising the first embodiment, which corresponds to Figures 9-13b (This may correspond with claims 1-5 and 13-15, 30 and 33.);
- II. Group II drawn to the specifics of the device of an optical encoder with a specific number of slits and driving system comprising a third embodiment, which corresponds to Figures 17-19B (This may correspond with claims 6-9 and 31.);
- III. Group III drawn to the specifics of the device of an optical encoder with a particular surface and driving system comprising a fourth embodiment, which corresponds to Figures 20A and 20B (This may correspond with claims 10-12 and 32.);

Art Unit: 2882

- IV. Group IV drawn to the specifics of the device of an optical encoder with each slope of a groove having a width of $P/2N$ comprising the sixth embodiment which corresponds to Figure 23b as allegedly submitted by Applicant in the Amendment filed 3/1/02 (This may correspond with claims 16, 17, and 34.);
- V. Group V drawn to the specifics of the device of an optical encoder wherein the light is reflected by the second region comprising a seventh embodiment which corresponds to Figure 26 (This may correspond with claims 18-29.);

The species are patentably distinct because one species does not require the characteristics of another species. Group I involves an optical encoder with grooves having different angles. Group II involves the number of slits in an optical encoder. Group III involves the surface of an optical encoder. Group IV involves the width of the groove. Group IV involves the light path of the optical signal reflecting off the second region. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, or V, restriction for examination purposes as indicated is proper.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 35 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2882

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Dariush Adli on June 28, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2882

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
